Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner * NitishVasave

Repository name * IT Tools

Great repository names are short, unique, and don't contain spaces or special characters. [Learn more.](#)

Description (optional)

☒ Public
Anyone on the internet can see this repository. You choose who can commit.

☐ Private
You choose who can see and commit to this repository.

Initialize this repository with:

Skip this step if you're importing an existing repository.

☒ Add a README file
This is where you can write a long description for your project. [Learn more.](#)

☐ Add .gitignore
Choose which files not to track from a list of templates. [Learn more.](#)

☒ Choose a license
A license tells others what they can and can't do with your code. [Learn more.](#)

License: Apache License 2.0

This will set main as the default branch. Change the default name in your settings.

Create repository

3) Repository Created.

Learn Git and GitHub without any code!

Using the Hello World guide, you'll start a branch, write comments, and open a pull request.
